29.aug is celebration of targeted individuals world [day](#)(many many people nowadays).
 At the same time - this book/website also represents targeted individuals from Slovenia.

There are also a lot of books about same subject, one of it is also down picture - a book from Eldon Taylor.

Old stuff - but still shown how this worked in the old days when tested manually - a prototype. At both pictures EnergetiX(R) and Automatic Mode are missing.

This are all mind programming ab-use symptoms, not just radio-wave sickness. If you think you are not a part of it - think again - it's called modern wireless brainwashing via wireless artificial intelligence(wireless ai), for wireless “social experiments” and wireless “managing of the market” by psyEnergyExploiters - usually not by regular politics but by the “good” guys/girls who try to lead black market and primary “intelligence agency”. Now - they try to have a little their kind of fun with humanity, since mind control has been tested fully in the past, so nowadays it's kinda sport. Most (neurological)“disorders” and “cancer” are also created this way - in fact - wireless ai manages psychophysical health of humanity nowadays for so called - human farms, something like monsanto does with fruits for productivity and for different other reasons, eg oppression. “How come I didn't know that”? because most people have been breinwashed from before with what is called thought reform - mind programming abuse business has been just masked with most illnesses/”disorders”(anxiety,extreme-tiredness-depression/etc), “mental illness”, bad luck, etc. This wireless brainwashing “system” is of coure the core of corruption for more than 50years now.

Introduction

This site is quite a lot about mind programming (ab-uses), but.. it's mostly for psycho-physical health and no-crap anti-stress hints.

There is a book called Games people play, but this could be easily called Games brainwashers/psyEnergyExploiters/"human"-traffickers globally play on humanity. In the old times money laundering was popular, but nowadays - full-blown psychophysical health laundering via 'illness names' is popular simply to cover up wireless psycho-energetic-experiments/business - reason for most 'neurological' illnesses, again not done by regular politics or most doctors.

Mind programming is a science via specialized telecommunication with or without nano/micro-chips - that not all are aware of, wireless ai. For easier imagining this, a reference - EEG waves can be used which can be easily measurable, but in mind programming a goal is also to reWrite them in someone's psyche to put someone into specific state or "disorder" or control, let it be for experimenting, good intentions, or in nowadays global mind programming abusive business - for global wireless resources/humanity exploitation - typical human farms, which is in other words - neuro marketing abuse. "Why don't I know that I am a part of someone's wireless business? well - brainwashers are gestapo weasels but not that stupid that they would put this on their favourite brainwashing boxes tv/radio - mostly "news". Wireless mind control was from always the most popular thing for leading black market, which eventually - with a more understanding how it works - made a way where we are now - global "commercial" mind programming of "lifestock" for anything the "good" guys/girls would want. Why they do this? simple.. they are stingy, that is - a good old greed.

There are two political systems:

one is commercial politics known to everyone and the other are the "good" guys/girls - the ones who lead black market mostly via mind control and a few firms and specialized telecommunication - parapolitics - the primary "intelligence agency family" which exploit noncommercial spirituality. The later also sometimes brainwash commercial ones - like in havana syndrome cases.

Brainwashing is 24hours a day in everyone's life - but not all recognizes it since it's wireless and Thought Reform has been done through it a long time ago and we should all be playing slaves for god sake: "you have disorder, since I am gestapo telling you that for my business". Childish games - but people with 2years old mind in grown up bodies because of bonsai massive mind programming - believes nonsense - like the "corona" bullshit. There is a book "Games people play" - but this could be called "games brainwashers globally play". Brainwashed kindergarten - so I call it a circus.

In the past mostly church was used as massive spiritual brainwashing tool, nowadays it's done mostly either through some firms, a few "good" guys at media business for "thy news" like "virus" hypnotism/brainwashing or other types of infiltration. One could probably nowadays made a semi ok 2000 or more people under mind control for human farm business with "illnesses and disorders" as their working horses, with a better computer for ai management and wireless interface - psychotronics - with optionally for better working a masked antenna somewhere or directly on updated telecommunication towers if the owner agreed to that(this are manytimes under the ground so people don't snoop around). Maybe some servers are used to store a "life-story"(what is said to be quickly rolled in front of someone's mind's eye before one dies) of people for statistics what in wireless mind programming and psyConditioning works from wireless ai strategies and what not - it could be called "akasha records".

Mind programming is mostly to destroy any kind of freedom, although blind and fucked up slaves are usually ok with - give me a house and I am yours. If one gives the rear hole to their black market spiritual papa(not commercial) - it will also get a bonus, but their primary tool is still the good old (global) lie - nowadays wireless ai is doing this job for them much more efficiently that they could manually ever do, since many don't doubt in "their" thoughts and think they are all theirs.

Ever heard of black magic or voodoo or demonic possessions?

well - mind programming is kinda father/mother to all that - but it's a science.

Better nonCommercial spiritual psychotronics can control all 6senses(kinda quantum science), create, reCreate or destroy them or work in any mind state(eg dreams, astral-plane and so on) and in mind programming markets which are nowadays everywhere - this is used on all everyday but in passive mode - "non-invasive" and "non-detectable" - a novice won't notice a thing. Remember that when you are next time having a nightmare, it isn't coincidence - it is to instill terror and psyCondition someone with fear by someone's wireless ai.

Where does conscicousness go when one falls asleep or when one dreams?

This stingy guys/girls have made all the experiments what concerns this kind of states via mindTech, so spirit is also easily controlled with better psychotronics.

One can with this baby in life make one either happy, sad, fully obsessed, extremelly tyred, paranoid serial killer or schizophrenic and so on, this is why it's called mind technology or simply wireless mindTech - for active mind programming some say V2K(voice2skull) is mostly used especially for voices hearing T.I.-s - since it destroys someone's psychological defenses and works intensively inside head/nervousSystem and it's also experienced that way - energetical tyranical parasitism or a headaches.

At the least - it can manipulate thoughts(try watching mind/thoughts for a few minutes - and you'll probably know what I mean if you will not be fooled by wireless ai workings, mind programming is by more than 50years interfering with thoughts/emotions process to redirect it in brainwashers favour - which is a well known brainwashing method). Professional mind control is this at it's minimum. At it's best - it is perfected spiritual technology and can 100% control all within(mind,emotions,energy,visual/auditory-things,etc) and other things - but this is mostly used in direct m.p.(types described later) for different reasons usually not in normal life - like monarchMindProgramming and others things where noncommercial spirituallity has to be destroyed in someone in the sake of someone's wireless modern mostly mental slavery business and/or for LTE: long-term-exploitation marketing games, in telecommunications this means long-term-evolution and many in telecommunication business probably know what mind programming means - at least "commercial" via nano/micro-chips.

Wireless mind control job is even nowadays probably still the best payed job on the black market, one type is used to fool/opress/exploit/make-"social-experiments" on humanity by passive mind programming(at least easy passive thoughts/emotions manipulation - some gurus came spontaneously to this understanding although they are not aware it's mind programming), but there are many people that are a part of systematically tyranic 24hours a day active mind programming like myself for many many different reasons, which are called targeted individuals or T.I. - in which the most obvious symptoms are headaches or migraine, extreme tyredness(depression) even when one slept the whole night or day, tinnitus, tingling(usually in feet), too dry heels because of intensified energetic mind programming or radioFrequency signals which communicate with nano/micro-chips which make organism dry or dehydrated(eg dry or metal taste mouth), para-electricity all over the body and so on.

Mind control/programming was mostly born with a goal to make business via making society wirelessly (covertly) psycho-physically programmable for "managing the market"(social classes and how smart one is, what kind of properties one will have or not have, who one will socialize with, "undetectable" social isolation - mostly used in active/direct mind progr. with combinations of psychophysical destruction of health - artificial agression is also used so that one makes more problems to him/her self in life or simply to destroy health - if you know how toothe nerves feels like - the imagine what can do a tiny nanochip on eg sweet spots which "market" brainwashers always like to use eg in or arround vagina or male sexual organs or somewhere in the brain or brainsteam and even in the heart or lungs and doctors don't know where health problems come from because all don't check at nano/micro-level, will it be millionaire or not, and that kind of crap, eg also diseases,"viruses" - also via media brainwashing "news",etc) - which is nowadays unfortunately the case for human farm business.

The good news is - bad or unexplainable things are artificially made - nature is neutral to all.

This is what puzzles the ones who still believe in god - why are bad things happening?

The "God" was simply replaced by energetic wireless technology - mind programming,

some have just taken advantage of this - because this is the only tool that can

be used to fool/brainwash humanity for managing world resources,

so that their highness takes honey while worker bees are producing it - so I also call them trotters traders.

Manual brainwashing done in earlier brainwashing business days was simply advanced into automatized - neutral mind programming was simply used instead of by then global brainwashing workaholics - nowadays they have free hands to do things that wireless ai is helping them along the way.

If one of them for example wishes a fresh sex fish with one of the "lifestock" people - it presses a button to brainwash that guy/girl into sex mood, all the rest does wireless ai, this is just one small primer.

A game and consequences of using global automatized wireless brainwashing on humanity

How much people have come out of mind programming trance/psyConditioning/brainwashing?

I don't know (personally I don't know anyone - which gurus call sleep) - but at least most noncorrupted gurus have to a degree "woken up" - but even they mostly call it "it's the mind, the mind is doing monkey or chatter mind and problems" - in a way this is true but not totally correct. The good news here is that this "awakening" is nothing special and it is not awakening - in fact this word was made by brainwashers to catch/hypnotize spiritual types and is not something to learn, but to throw away psychological burdens, mental rubbish and (global) lies which works in brainwashers favour to squeezed vitality and life juice out of individuals like juice from half dead batteries - something that commercial psychology schools are not taught about. For this - quite a lot of mental crap has to be thrown out of psyche and work done by individual - especially by the ones who were a test/business subject of "much better than hitler tortures" monarchMindProgramming.

This sport/business is mostly a wireless mind parasitism.

A little history of mind control

What had to be first created for "social-experiments" business?

Of course - psychiatry - to cover up what was really going on and is still here.

Nowadays - there are maybe still a few in that business that still cooperate with the "good" guys/girls.

Wireless mind control is even nowadays probably the best paid job on the black market, if corrupted ones want to get rid of an opponent, one orders "the right people" of mind programming services/jobs to make one "crazy" via putting one in active mind programming mode ("disorders" - 24 hours a day psycho-physical systematic tortures with or without nano/micro-chips - so called T.I.) - which is nothing but a covert wireless mind programming abuse. Active mind programming of someone is nowadays controlled randomly by ai for optimized human farm exploitation/better-production or sometimes still manually - if one gets someone to nerves or has to be eg silenced/oppressed/etc. The "good" guys/girls have made conditions to make society totally psycho-physically programmable mostly for good old exploitations or if someone gets on their nerves or just because spoiled psychopaths want to make a little more psycho-energetic tests or just have fun with "livestock" not being aware of wireless mindTech.

Of course weird things like concentration camps and alike were a heavy test subjects to wireless mind control experiments with specialized telecommunications with nano/micro-chips (memory to that is later electronically erased) or without and it's indirectly created dictator was also a part of it. I know how violent/aggressive one can become in a milliSecond via better mind programming - nerves are easily overwritten by a few milli-watts of aggressive power, so this is easily doable especially if one is not aware mind programming exists - this is why the term was created - a puppet, you could call "marketing" brainwashers - masters of puppets, and no - this are not the metallica guys.

Gsm means global system for mobile communications - so this could be used as well, aka having a button which stimulates global telecommunication network at once in a milliSecond is not a myth and this was in the past definitely experimented on by "intelligence agencies" - but psychotronics which came from radionics - usually does not need that, brainwashers have made themselves all kind of mindTech toys in the past for their "defense agency".

Types of mind programming / electronic brainwashing

There are three types: passive, active and direct mind programming, the difference is in quantity/levels and intensity of different mind programming usage:

- **passive mode(“uninvasive”/“undetectable” - most people):**

which is used for most people for uninvasive psychophysical health and states management - mostly at least manipulation of thoughts/emotions and psyConditioning(“uninvasive brainwashing”).

We are all also at least a part of 24hours a day subliminals - one can check this by making a piece of 3.5mm audio jack and stick it into computer 3.5mm audio jack/microphone. Then record that with eg free audacity software, 1st without touching the other back end of cable and then - with touching the other back end of a cable. In both cases subliminals can be heard by first using scrubbing(at the top) in audacity going right/left through the recorded track. Somewhere - you'll definitely hear something familiar and that are subliminals. When one touches the other end of the cable - track is of course much more powerful - which also somehow shows how much dirty emfSmog goes through our body/mind - so I recommend that for testing.

This mode is meant for “undetectable” - so wireless ai is daily throwing here and there thought/emotions and fooling population for psyEnergyExploiting/guiding psyche purposes(also eg throwing in a little fear emotions/energy into individuals/population in synchronicity with brainwashing lies on the tv/radio so that one goes vaccinating with their brainwashing cocktail for more 'market management' purposes) - this is why i recommend checking here and there “your” thoughts - recommended also by some of noncorrupted 'gurus' and some psychotherapists(active mind programming is another story - which is a part of all mildly visually/auditory as neuroLinguisticProgramming after birth and harshly also energetically before death as “rheuma”) and psychotronics works with sensing(for example - i didn't notice this while this was in effect about ten years ago) - if ai detects that one is consciously starting to see that something is wrong - ai stops for a while and goes in more passive state of conditioning.

Headache, bi-polar or many other “innocent disorders” like chest pain/anxiety/nervousness and/or heartburn/acidReflux/stomachAcid problems(more in active mode) and/or burnouts/depression that are in effect because of passive conditioning. A very common thing nowadays are unheard subConscious subliminals or silent neuroLinguisticProgramming(anyone can test this) - i really don't know if anyone is not a part of them, some say they use them in their advantage - but i don't think reWriting with force nervesSystem(which can with time also produce any “illness”) - can do that. Synthetic telepathy is also quite popular for thought/emotions patterns creations/psyConditionings in individual mind/body - may also be microchipped usually in early years. Most won't notice anything about this while this is in effect except maybe heartburn/acidReflux/headache and maybe anxiety if you are not yet brainwashed by it(if - and when you have it, watch it's energy - how it works and where does it come from - it's probably activated microchip thing or psychotronics hot spot).

- **active mode(so called targeted individuals):**

this is all that passive mode offers + more mind “disorder effects” + more intensity.

If one has been nano/micro-chipped(usually in early years) - this are cca 50-90% activated, while in passive mode this are usually at low “non-detectable” intensity around 5-50% - but may go to 80-90% if a person would believe one is suddenly anxious because of some external event - like a state of mild shock - which is a part of psyConditioning for psy-energetic-experiments.

Psychic attacks are quite common here and this

are usually something that is from radionics known as DOR-deadlyOrgone, but could be also a beam from telecommunications(radar,satellite,etc). People suddenly seeing black screen in front of their eyes are usually a part of this - some call it “my sugar has fall” or something else. Sometimes methods from active m.progr. are used also here and there in passive mode - active mode is usually activated in older people in form of dementia or other “therapy”. People were just fooled by putting them pinky glasses on via wireless brainwashing - that's all.

So, tyranic and intensive 24hours a day

psychophysical health destruction and torturing via "disorders" is activated - all by wireless ai for human farm purposes or by someone doing it manually because someone get's someone on nerves. This are all so called T.I.-s. There are many organisations and books and also demonstrations and other things against mind control abuse. Many "Mental health specialists" don't know about this since it's not taught in commercial schools - so they themselves sometimes unintentionally brainwash their clients with false hope and/or pills(a part of brainwashing black comedy circus), of course - they themselves are also mostly living a brainwashed life - like some gurus would call it - "sleep", core brainwashed believes are working in them as in anyone else, although with this I don't incline they are bad, I just don't for now recommend psychiatrists if one has "disorders". For aggression buildup - one could go running or doing something else to release adrenaline that was created by mind programming out of nowhere. Most t.i.-s don't have any kind of criminal record whatsoever, many of them would not kill a fly.

Active mind programming is exactly like bio/neuro feedback(+more) but totally wirelessly and used for psychoPhysically ReInforced Torture for many reasons(even moreEnergyHarvesting) and to destroy someone's psychoPhysical health - while one usually in normal circumstances uses bio/neuroFeedback to build up someone's health and reWire subconscious believes in one's favour, mind programming abuse does exactly the opposite for wireless oppression/dictatorship business, trying to reWire subconscious believes in negative ways and at the same time destroying psychophysical health. Some go into mental hospitals not because they want to, but because this makes them so psychophysically weak - that they can't do basic survival things and go voluntarily there.

A quick trick that i read in one of the books to test if one is a part of active mind programming is simply going to EEG, and if one has too active/aggressive EEG waves - one is a part of it. Although this is usually only to get evidence, because one can not overlook signs of this - especially at start when one is thrown into this program. Nerves(including brains) are artificially wirelessly 24hours a day overstimulated/destroyed - this is what causes aggressive/spiking EEG results - from inside this is many times felt like someone is agresively burning - yup - one of the real hell states - which some people overlook warning signs - which can later also produce regular burnout or even nervous breakdown. When i went to eeg tests, a doctor there at the end said that i was probably very nervous, although i was on the edge of falling to a sleep when she tested this - which just shown what i was knowing from before. Some people are very nervous/anxious, true, but people/doctors are not asking the right question - what is attacking nerves in the first place - where do "bad nerves" come from, this is where the problem is.

In this category - this is easily recognized like tinnitus, weird head pressure or whooshing in someone's head and breeze like nervous(probably pulsedDC) electricity through head/body or other weird phenomena - more after a few sentences. This is typical silent wireless electronic torture(usually anyone in this category has somewhere daily - (almost)nervousbreakdown, because body is treated with nervous electricity which produces tremor out of nowhere - especially whole nervousSystem(also by nanoMicroStimulators microchips), rf detector shows this - especially when one does not move - this becomes obvious when one tries to rest - but it can't - because nervousSystem is always firing/simulated artificially even when body is resting - adrenalin is artificially produced - it's like one's whole nervousSystem is fully under stress - constantly under mild electroshocks like one would burn in hell - this usually with time produces chronic tiredness). All of this usually manages psyExploiters ai - reasons for one becoming a part of that may be different - many are a part of this only because they were test subjects while they were young - and now they are treated so that they would not remember things or that they would be silent, some become a part of this because some schmuck want's to test/advnance new psyExperimentStrategies, some are a part of this strictly to be tortured/opressed because their highness doesn't want too healthy individuals on "their" spoiled psychopaths big boys/girls market.

Active mind programming is very easily recognized - any kind of more intense mind/body suffering. In head it feels exactly like branwashing - like someone would from inside 24hours a day "fixing/brainwashing" someone's mind and/or be bathed in microwaves or like ghost would operate someone's energy, some also call this "intrusive thoughts"(or add/adhd) but it's more than that - it's typical wireless electronic/psychotronic psyConditioning(mindFixing/manipulation in someone's favour) and

mind state is then totally like - [this](#) - which is wireless electronic/psychotronics oppression - one can not then manytimes do even the most basic things to live. When one becomes at start a part of this - life as one knew it usually in a few weeks just "falls appart" and unusual things start to happen - goal is also psychological/social isolation - more friendships/familyMembers violence may be there or it's other extreme - total zombification. If this could be stimulated in anyone just for experiment - anyone would pretty well instantly spontaneously guess that this is mindControl(also what concerns "hearing voices") - sudden active mind programming is very easily recognisable when one is a part of it from inside - that's why it's sometimes at start slowly with time activated in someone's body so that it looks natural "ghosts show"/disorders - although many in mental health waters are brainwashed that it's "mental illness" - because their modern 'young sect' highness wanted so - so that their divine business could run - which also includes external "corona"/others brainwashing for all via media(tv/radio/etc). Yeah - a weird hobby some have.

Symptoms in this cathegory:

Here - this symptoms may be more active/noticed: tinnitus, forced/intrusive thoughts, preventing some thoughts(m.progr. ai is quite advanced and selfSufficient(self-learning and learning through live beings), when one for example thinks how to get rid of this - ai chooses as punishment for example a headache/migraine/dementia/mildPsychosis/energyStress'Therapy'/moreVoices(forVoiceHearers)/etc, so that one is disabled), intensified chest/plexus pain(which produce heartburn, acid reflux or stomach acid problems) - just this and one is usually disabled by it and becomes instantly very tyred and must rest but usually doesn't help much - which are usually microchips+telecommunications abuse thing(this has probably most people in - it's modern "cancer" business fuse - one of psyTerrorists/psyExploiters ensurances if one would not respect their paraPolitics circus - some already sued the bastards - a part of covert mind control), on quite some - hearing artificial voices heard only by individual(which are dark-satanic/heavenly/"normal" NeuroLinguisticProgramming abuse) - which is a layer of voices on what's already naturally heard - or is fully manipulated/overriden hearing of other sounds, some have visual halucinations(eg seing something that other don't), artificial mild/hard psychosis/schizophrenia, energy manipulations(some misunderstand this as devils work or ghosts going through their bodies which may sometimes play on sexual organs also), energy trafficking/conditioning(check 'energy stealing/trafficking2' in Symptoms section). Here - many get a feeling that his/her mind is not his/her own and something is trying to control it - which is true!

It can semi to 3/4 override mind with anything - eg sexual thoughts/feelings/subVisions while one doesn't have any sexual intent - eg for sexually psyConditioning someone(sexuality is probably the most abused thing in this business).

In this stage - psychotronics are usually creating/mimicking any "mental illness" - like "hearing voices"(which is (dark)deliberateNeuroLinguisticProgramming-wasAlreadyProvedAndItCanBeAgainIfNeeded) or a (weird)headache/tinnitus and mild/moderate/hard psychosis or paranoia/histeria or paranoid schizophrenia etc, which would hold true for anyone if one's whole nervousSystem and head would be irradiated via eg microwaves like stuff - this are "non lethal mind weapons".

In this mode - psyExploiter's ai uses any problematic situation to psyCondition someone more - "voice hearers" are usually in this situations proBullied(proMindFucked) more by voices or some other method is used. Eg - one has a problem in life - and that is ai using to psyCondition someone more with tyranny - proPerfectPsyAbuses, eg if someone has financial problems - ai will try things through psyStrategies - that someone stays in a shit, and ai usually doesn't have limits - it tortures(especially because this is 'not seen from outside) - and some people are suffering as hell - which is a part of sadistic conditioning method in which psyExploiters are also specialists(the most sadistical methods in it's whole spectrum are owned by them). Problems are usually used to create more problems. People that "hear voices" and say that theirs are good/supportive - just don't know what they are talking about, then you hear some of them ending in an mental hospital because of chronic psychological exhaustion(some are there that go voluntarily in mental hospital - because they are so psychologically fucked up by "dementia" or "schizophrenia" - easily produced by microwaves like mindControl, psyExploiters ai is just self-learning

oppressive/control strategies on most - that's all).

In this stage, also many loose jobs, friends, have family breakups, have daily very unusual experiences etc and one's life is being deliberately destroyed. The goal is to make someone's mind as de-humanized animalistic primitive and destroyed as ai(or who is behind) want's to - making someone know that s/he is being easily tortured(whoever is not brainwashed with "disorders") with so much ease. This is to literally try to push someone to nervousBreakdown/suicide/etc - because in health system all don't know about this - and there are not many places where one could go. Inner psychophysical torture is done 24hours a day - more when one is at rest and if anyone would experience this and would be a little aware of it's inner body - one would instantly know it's done artificially. More of this paragraph is on a website.

Amongst this are - for people who does not experience it - weird symptoms like: hearing voices(which is nothing but real wireless neuroLinguisticProgramming abuse) - although any kind of sound can be produced in anyone's head(eg youtube video sound or any radio station) and others don't hear a thing, but voices are used simply because this should create an illusion that they are because of "mental illness". "Mental illness" was from the start a brainwashing lie so that "good" guys could do any kind of "psychological" experiments on weak people. This is an old thing but quite many psychologists still believes nonsense.

Hearing voices(some call it V2K or voice2skull) is sometimes used in modern museums when one walks in front of some picture and a ultrasonic sound produces a voice telling story about that picture, so that it doesn't bother others. Ultrasonic technology is just one such example, there are many more. I am not sure what professional mind control uses for this, but I think it's combination of both: an nano-implant + external energetic control(similar but wired stuff: neurophone can be bought to put it anywhere on the body and one hears it bypassing the ears). It's heard something like 3D Dolby Surround and this psycho artificially many times whispering created voices(exactly like on many android smartphone apps - exactly like ASMR binaural Triggers in triggers menu) are mostly bullying/nagging someone with combination with other mind control stuff - mostly used like livestock on a rope. Now, when alive human is talking - s/he is heard somewhere around of his own mind, but here - it can be heard around or backpiggig(known method) via tv/radio/etc and also directly somewhere inside of the head - which is irritating as hell - such control usually uses the most annoying high-pitched sound to make someone loose his/her mind all the time - something like mosquito buzz, that's why most voice hearers has also tinnitus - which is somewhere on a threshold of hearing range to aid help to the psychophysical torture/opression.

- **direct mode(total mind/body(all motorics)**

- **pure override and/or extreme psychological tyranny/sadism):**

some say a lot of musicians/actors/sexIndustryWorkers was produced like this - monarchs - although this processes were later used on many many more - also groups of people for "social experiments" and mind programming markets(humanFarms), SRA(satanicRitualAbuse is a lot used - more on wikipedia).

Well, what can i say - someone should experience it and one would know what's above "hitler's" hellTortures(m.prog. includes all aspects of life, it's machinery like very precise "military grade" like wireless psy/emotional/body-control) - which is mostly used in long monarchMindReprogramming process - a wireless science how to reProgram/reImplements someone's mind from the ground up, so that one(or their ai) creates an human product that is needed by them on the market or because of some other reasons - offers are usually dark in nature, they try the easy and if offers are not accepted - the hard way. If one would leand them an ass - one would probably get with time all that he/she wants - all the fancy stuff, money,house,girls/boys/whores etc - so i call this sometimes butthole pyramid system. This are also tests if one would work for them like this - as their sex slave - and lend them ass later some more and probably do other dirty jobs for them, which is probably a test for psychological submission - alla style "who's the boss".

Symptoms

Down are all personal noticed symptoms, but

passive mind programming symptoms(someAlsoAPartOfActive) are [here](#)

and active/direct mind programming symptoms are [here](#)(although i didn't have red eyes).

Or for stages into active mind programming: good webpage about [stages](#)(i am not sure about 1stVideo but it's possible) or [this](#) or [here:petition+quickSymptomsList](#).

Symptoms description ending with '...' are on a website described in a larger detail, anything that can be done with nano/micro-chips, can be done with psychotronics only:

- 'life is hard' feelings and/or weird things may be happening through the day
- tinnitus(also mentioned later): one of the most obvious active mind programming signs
- tingling nerves in feet or anywhere in the body: also one of the obvious active mind programming signs and can be done like all the rest wirelessly either via nano/micro-chips+specialTelecommunications or psychotronics interface. Brainwashers ai does this either to destroy/mild-torture or steal nervousSystem energy that builded up and should be used for individual nervousSystem care(proExploiters oppinion is that no one but them should be healthy enough - since they are using humanity as a exploiting/opressing object also for their EnergetiX(R) smart asses thing).
- the most obvious sign of any wireless psyConditioning/brainwashing or mind programming is (chronic) (psychological)tyredness - non vitality - some call it depression/burnout: yes, i know - there are a lot of people like this, brainwashers invested a lot into destroying/opressing/stealing others psycho-physical health/vitality/chi "undetectably"...
- auditory check: one trick that i discovered is this - go into a quiet place and gently rub first arround one ear and then the other. If skin arround one ear is more sensitive and ear drum is slightly heard while rubbing(manytimes tinnitus people), something is not as it should be - one is usually a part of active m.progr. One has probably crystal telecommunications impregnated into skin arround/in ear or is implanted there or psychotronics are used. Impregnated skin sometime does corrupted substance/material designer for them and then quick noncommercial spiritual guided by ai or regular operation is used to put that impregnated skin back on the t.i.-s face/body - usually in early years. A part of modern human design covert tests/control/experiments.
- the most used psyTricks on all/humanity - nervousness and/or irritability and/or agression(since this are somehow also daily a part of life - many confuse this with artificial entraining): in active m.p. - this becomes amplified and obvious without any reason - nerves overstimulations tortures by wireless energetic science - can be done by better psychotronics or nano/micro-chips(tiny much smaller than hair nerve stimulators - also in inner ear or head for "voice hearers" or tinnitus) and usually goes away when one starts to move. This were with mind programming markets simply meant for psyConditioning("worker class" having non-quality insect/bee-workers psyche - something like when one tries to sleep with mosquito buzzing arround - mosquito never goes on nerves to person who is not a part of mind programming) or are a byproduct of covert mind programming. You could check this energetic training right now or sometimes later: just recheck your energy from toes to head within your mind - if there is edgy/nervous energy somewhere - you are a part of energy entraining/psyConditioning by brainwashers wireless ai, "bad nerves" are a typical sign of this since nerves and nerve endings are attacked/slowly-fried - literally - by electro/emf-smog like energy on a microlevel, so microwaves(or what is called microstimulations by psyhicians) could be also used for it...
- dry mouth or weird mouth taste or even metal taste which is from "microwave"(radiofrequency) or psychotronics energy possibly x/gamma/etc-ray irradiation(also the case for many other things) - all automated by ai

- dry eyes, causes are same as above
- quite cold or very warm feet or weird feeling like ants would crawl through them - typical "commercial" - passive mind programming thing - health psyConditioning
- stiff neck or pain in the back and lower of the neck or burning symptoms in-there(if you put the right material/shield there - it usually goes away): i got this right now when i write this although it's 1 minute till i sat on a chair to update symptoms list - so it's definitely not from work(this are normal treatment in active mind programming - ai 24hours a day always serves psychological and usual health management/treatments mostly in combinations of many possibilities). Although brainwashers wireless ai manytimes uses some pain/psyConditioning when it's easier believed by a person experiencing it - and - that is from work, which would be typical passive health psyConditioning("commercial" health laundering/brainwashing - like some do money laundering, hmm - terrorism everywhere in front of all but all blind/brainwashed). Yes, there are times that some pain or whatever may be from hard work, but only because we are still living in a world mostly created/controlled by proExploiters sadistic tricks and brainwashing to manage 'livestock', else in reality - any pain, disorder or suffering or "personal problems" are very rare, this is where most work is to correct the psychological damage...
- typical wireless "cancer therapy" scenario: this is usually not overnight - "cancer patients" energy is destroyed a long time/years before it's felt/seen on a physical body and someone diagnoses them with a few alphabetic characters(any illnesses names - also future ones are usually just taken down off internet sites - the real thing is of course mind programming abuse). One is a target of bombarding nerves with emf-smog(similar to T.I.-s but not so obvious), whole nervous system is kinda bursting/spiking with artificial energy on a microlevel because it is wirelessly attacked - slowly but constantly - which usually produces irritation, nervousness, anxiety, aggression, "can't rest", hyperactivity, if one was before of a good health, with years - this may become depression/hypoactivity and voila, after more years doctors may diagnose someone with "cancer". It's not the end of the world, it's not "cancer" - it just systematically destroyed health which signs are usually overlooked by a person because so many innocent things are nowadays taken for granted in bad health - that should never be there because psyEnergyExploiters/brainwashers have done their homework. So, one should either experiment by him/her-self or find a professional(ideal would be a building biologist) for at least sleeping space shielding(this works for special telecommunications eg 5G/6G/7G signal beaming/targeting but may not work for psychotronics - although less emf-smog environment usually helps for this too) or find an area/place where one's organism is not so attacked anymore. Yes, easier said than done...
- a part of the body is pulsing with anxious energy(or anxiety/irritability) or head pressure is there: this is usually a sign that dew(directed energy weapon) is used on that part - high frequency, plasma, psychotronics, other exotic toys etc chosen and controlled by brainwashers wireless ai. If this is used on men testicles, they get a little swollen and usually aggression starts to build up - in the past some prisoners were tortured this way for "psyExperiments" and "security" reasons with a little more intensive dew attacks. When this same dew energy is directed into head - some call it psychic attack and there are some commercial products against this(eg hats, devices, etc - more in tips section) - but i don't know if they work
- acid reflux problems or problems with stomach - which is usually either indication one is treated with psychotronics(used as energy weapon for commercial psyConditioning) or microchipped in acid reflux problems area or some kind of neuroToxic(usually nanoWires) metal was put there somewhere in childhood and is usually activated by ai here and there to create acid reflux even if one doesn't eat nothing. This are usually quite painful somewhere in the chest/upperStomach/diaphragma area and it may feel like one would create an small opening wound in there, usually people take stomach acid neutralizer pills after that
- pulsing headache/migraine via high pulsed short but powerfull "woodpecker" radar like signals: this is

usually an indication one is a part of active mind programming and if one is a little attentive how head becomes painful - one can hear short pulses usually from above(satellite?) right through skull into the center of the head - penetration of the skull is heard. After this - one's head is for cca 3-8hours psychologically destroyed, meaning one can not use head as usually for some intelectual work and body/head depression is always there. One is again like one would be in concentration camp because usual shielding doesn't work and one can not get away from it and must suffer pain until ai(or brainwashers behind this) - stops. This is what usually awakes people if they sleep - it is irritating as hell - "mental illnesses" are also produced that way. "Woodpecker into the head" Pulses are in realtime faintly heard something like [duga](#) radar(scroll down to audio sample) - but are not from this radar but something else that can be probably also done at home, although in the past duga radar signal was very strong - and were probably tests for mind control for implanted people or in combination with other things(r.n.m.?) - how specific signals/strenghts work on consciousness.

- the same as above "woodpecker" signal is also used in milder form, but here - one experiences this energetic attacks(some would call it psychic attack) on nerves, meaning nerves system is targeted. When this happens it's something like when one is put on PEMF(pulsed electromagnetic frequency) device, one feels harsh nerves shaking/tremor and after that stops for cca 1 second and this repeats from about 2-30min until psyExploiters ai decides to stop, if one moves a little or build aproprate shield - this suddenly stops. This rf-energy attacks penetrate and fill one with rf-energy and after that one is full of rf/dry microwaves like energy and fully stressed/irritated and it can be usually measured(tinnitus or "hearing voices" is increased if one has one of these): if one is before that in healthy state - one becomes agressive and/or hate is produced, but if one is before treatment depressed - one is just more irritated and becomes chronically exhausted and "dead/burned out body" syndrome is there, body heat usually goes a little higher. This pulses(or the ones from previous paragraph) always awakes someone if one is in the middle of sleep because they are agressive, in fact any radiofrequency energy is agressive/dry especially when it's directed. Older people sometimes call this rheuma, although it's energetic attack - energetic torture and they are more at stake because they don't move much and rfEnergy is concentrated in the body as in "concentration camp". Some that don't know what's going on can easily experience nervous breakdowns in combination with other methods. This is where some go to doctors/psychiatrists which gives them pills - although just nervous system is harshly wirelessly over stimulated/attacked, the real cause has to be recognized - not filling body with toxins like antipsychotics/antidepressives, most people are already too much filled with heavy metals from pipe water and other crap. When you understand a little how mind programming works - you can go reading pfizer good-night-sleep-lulaby-stories [here](#), signs are true - but what causes them(stress,anxiety..) is a "be in the mental kindergarten" - unintentionally(written by brainwashed people) or intentional thing for brainwashing, the same goes for [brain and nervous system](#) which "illnesses" were created deliberately a long time ago by psyEnergyExploiters ai via mind programming - a part of sadistic 'livestock' management for global victim mentality psyConditioning(unknown causes methods), professional 'international business machine' easily creates any of this - although it's not exaggerated and used on all. I wonder who is indirectly really in charge of pfizer and similar companies?
- regular 'innocent' anxiety/nervousness/agitation: don't confuse 'energetic' or vital with this - many do, then it may come a day when some illness is there because mild intoxication warnings were overlooked
- chest pain with (hard) heart palputations: this are very good signs of active mind programming - i get this daily when i try to rest(same was in childhood,30years in beetween i was not a part of this) - and it's used to disable someone energetically and physically - one is usually in depression/badMood and extremelly exhausted after that.
- any toxic stuff or [neurotoxins](#) or drug symptoms and/or heavyMetals symptoms!/: even when you are not taking any drugs or chemicals and you are living healthy enough. More on neurotoxins at the end. PsyExploiters/brainwashers main symbolism is [this](#) - their concerns is how to get toxic/reactant/other stuff into our bodies, it's their "job".
Recipe is simple: to you toxins/psyExperiments/inbodyChemicalReactions - to them your vital energy

and/or oppression. Small dosages of poison/[microdosing](#)(or just any wireless [microdosing](#)) is the cheapest and easiest health management/exploitation/oppression/destruction of masses("corona" coverup). Some neurotoxins can be from outside(pesticides,insecticides,bad water,old water pipes,etc) and some are from inside(mindProgramming). You can read more about why in-body chemical reactions(EnergetiX) - at the top 'how is corona created..' - then somewhere at the top 'show/hide more'. This should be a little more tested - but for now - i think this is exactly it(some in the past made a lot of human cell-id optimal energy harvesting experiments on us) - corona for sure isn't 'virus', but some would start to phylosophize(which is again a brainwashers psyTrick) - "there are too much people in the world and this is overpopulation control". Then, they can destroy themselves, world would for sure breathe much more easily. Sometimes they call this 'purification program', although some are just trying to energy harvest sahara for god sake and play "who's the boss" game.

- quite popular amongs brainwashers/psyEnergyExploiters are wireless small dose air poisonings of individual(that gets on their nerves because s/he is non-corrupted) via psychotronics(also kinda [e-herbalism](#) which some use for ok things - eg for distant healing - but client agreed to that - it can be called wireless BioEnergetiX): in divine business - mostly insecticides, neurotoxins, poisonous chemicals and such are used, maybe even small heavy-metals particles. So, if you sometimes instantly smell something unusual, or were instantly poisoned - this may be it, but it may also be just someone playing with your smell 'sensors'. Sometimes if ai(or brainwashers know many are in the same room) and are all dispensable - whole room is filled with such neurotoxins, and if someone is in same room(not coming from fresh air in) - it may not notice it, but of course - this can also be done when one is outside - anywhere. This are usually here and there - so that "undetactable" poisonings and bad health works with time. This are always a part of proBrainwashers tools and a part of divine business games.
- very popular amongs brainwashers/psyEnergyExploiters(stiff neck / pain in the brainStem / other health problems) this usually indicates nano/micro-chip in the brainstem, you can check 'microchip locations'(and also fullbody "meridians system" - implantation system there). This can also control many subconsciousMind things, eg instantly making a fewer, appetite manipulations, motoric control(used sometimes in activeMindProgramming eg - veryquick headshake - to terrorize someone and to instill more feelings/terror/fear that one is controlled/supervised - "you are our remote controlled doggy",but always used in direct for 100% mindControl/deepPsyConditioning) etc, but there are also other ways to accomplish the same things
- muscle twitching: this is mostly a part of active mind programming and is a deliberate "side effect" of being poisoned via too much neurotoxins or heavyMetals - inner body microdosing(these are available for more than 50years, "glands" that works on nanochips principles aka "[wireless drug delivery system](#)" - i don't think official health system has these yet). A part of mindControl via neurotoxins in combination with other things health destruction.
- deep hunger - one must eat something immediatelly(300kg+ people in usa? yes). This is usually one of the first lesson of new mind programmers, probably also via subconscious vagus nerve impulse via microchip(or releasing hunger chemical through it) or only by psychotronics
- dizzines, vertigo: after this sometimes body becomes very weak and starts to shake a little - some mistakenly call this "my blood sugar has fall" \
- face skin burning effect - usually forehead is like it's burning - like it would be frying with rfEnergy: many people get this - especially targeted individuals or older people(yeah - older people are deliberately more intensively treated by ai, some try to help themselves with eg handkerchief or some peace of clothes etc but it doesn't help much) - although it's someone's ai's dew(directed energy weapon) abuse(psychotronics or high frequency) - skin frequency effect
- general parts of the body(usually legs) via burning effect or bad capillaries: check [this](#) - this are not a sign of bad heart but all from mind programming abuse - especially many times 1st pic - which comes from

years of abusing energetic weapons on someone by brainwashers automatized wireless ai for their human farm or psyExperiments or business, usually some body part is slowly 'fried' by such wireless treatments via more months/years.

- psychological pain in the head(eg depressive pressure or concentrated sharp pain anywhere in the head, one can not think or do other but sleep) or pain anywhere in the body(eg leg, arm, back pain, etc). All of this psy/body pain are disabling - depends on intensivity. If for example one happens to experience this and is also a voice hearer, what do voices say usually at this 'apropriate' moments? "pill". Of course this clearly heard voices while no one is there - aren't ghosts. They also usually say at this moments - 'suffer illness' or 'suffer health', a part of building oppressive psyConditionings, some are building houses, but this mongoloids are trying to build 'opressive/depressive/sadistic psyche' in the name of psyEnergyExploitations.
- high pitch noise(or tinnitus): goes with upper and both makes one melancholic - one would just want to do nothing sometimes all day. Sometimes some kids are told that they are lazy, but this may be in effect
- muscles of the back of the head are tingling/buzzing as if electrified: sometimes - a whole head is very rapidly turned by small degree in both directions left/right - like a force from the cerebral cortex(smallBrains) would be implanted and fully controlled - which is motorics area
- hearing voices(one option how this [works](#)): this is deliberate (dark)neuroLinguisticProgramming, although they are sometimes heard as ghosts or anything else(fast/slow speed is sometimes also used by ai - fast is usually so fast that one doesn't get what the voice said). Voices are electronically made driven by ai. It's strategy is something like bio/neuro feedback. Voices are adjusted based on someone's thoughts, and for that - telemetry is used. You can check flannagan's neuroPhone how circa this works - bypassing ear nerve - that's why deaf people can possibly also hear with neuroPhone.
- visual hallucinations(visual cortex override): i don't get this but some do - like seeing ghosts etc - can also be a part of mind programming
- dreams manipulation: i get this all the time - it's intensified with very vivid more than nightmares(cyberTorture) in active mind programming. Yap - this are sometimes so bad - that someone thinks that that is someone's real life by then - visual cortex override methods - and usually because this are very harmful episodes - one goes into a paranoid state. When one wakes up, it's immediatelly over - but it's effect can last for some time
- wet dreams: yap - orgasms can be by mindTech simulated(people that have nonstop orgasms?) - but sometimes ai(or mindProgrammers) are doing this in artificially produced wildest dreams - also a part of sexual conditionings, especially because someone is in dreams in more accepting brainwashing 'coma' state, much more near to subconscious mind but in an external controlled ambient.
- sleep is in general very good for psyExploiters weasels, because one is not so aware what is happening by that time
- when one goes to sleep(or has closed eyes) - white light, like one would make an electric shortcut in someone's head, like a lamp would be very quickly turned on and off in someone's head. This can be reproduced by anyone quite easily - a little voltage on the head - and voila - we have an very tiny mind programming 'symptom'. What would doctors/psychiatrists do? prescribe pills. Ha haa, now someone can go nagging psychiatrists a little with this, although mindProgrammers do it wirelessly, manually would be implanting someone in a comma with microinductor/microtransducer somewhere in the head and voila - we would have a toy wo/man psychiatrist, and not only that, but psychiatrist with mental illness for god sake. And not only that - s/he would have to prescribe pill to him/her self!
- psyConditioning(psychologicalConditioning): this is ususally in combination - eg a thought + perception

+ emotion + subVisual imagery or "hearing voices" neuroLinguisticProgramming. This is how wireless machine(usually psychotronics) is psyConditioning someone in realtime - nowadays part of most people - although this is in active mind programming easily noticed

- thought implanting: thought can be easily instilled into someone's mind - a little depends from person to person and how much is one aware of this workings, except in direct mind programming(totalMindControl), where full organism/mind is being mind programmed directly like a computer - including thoughts
- intrusive thoughts(bombarding one's head with mental/emotional garbage,thoughts conditionings,etc): this is a 100% sign of active mind programming - alongside is ususally a headache - although not necesarilly
- disallowing some thoughts(opposite of upper though implanting): yes, this kind of mindTech can identify thoughts, and based on that - thought can be either disalowed(one gets a headache/migraine/etc), or another thought is implanted into that thought(one also gets a headache) - especially if it's someone's idea of how he/she would get rid of this, or one gets inspirative idea, etc
- emotional conditionings: emotions are conditioned with a reason - almost a medal if one figures out why
- headaches migraines sometimes psychosis: too much energy drainage or conditionings with "mental illness" - check next down
- quickly tired - which may be from psychotronics thought oppressions and melanholic stress(laziness is many times misinterpreted thing - some say a kid is lazy) or a sign of energy stealing(check next down)
- energy stealing/trafficking(badOverallHealth) and conditioning with negative energy so that best is drained for people behind this(mostly via microwaves and/or ultrasonicFrequencies): weak electroshocks through the body instantly makes one weak/melancholic/lazy and body is usually shaking a little(hmm, audrey hepburn effect)
- energy stealing/trafficking2: energy trafficking/conditioning, eg taking/trafficking good one and instilling a bad one - this is very clearly noticed, eg electronically stimulating artificial vital/chi/life energy - energy goes from rootChakra(tailBone) through body and out through top of the head - fullyInvoluntary when one for example sits(body is slightly swaying by then) - hmm - i wonder where they traffic all that vital energy - then of course one is exhausted, because one is being used for their 'energy pump' - technological energetic parasitism/vampirism. To temporary prevent this - go away from electronics, lie down or go for a walk. If one is drained via solar plexus chakra then lying won't work(one feels something in that area and is usually either in bad mood or melancholia state or feels pain there).
One quite obvious symptom of energy stealing or just psyConditioning or oppression would be tingling toes on feet/arms without a reason, at start i was thinking - "hey, this is my 'inner child' doing!" - of course inner child is just a brainwashing manipulative psyTrick for psyConditioning purposes - it's brainwashing roots goes quite back before new ageism. Inner child - like some call it - is in monarchMindProgramming a part of special sra(satanicRitualAbuse) altar - which is meant with time to become some unconscious alter ego, because any illusions/lie that brainwashers succed to implant into anyone's especially unconscious mind(meaning one is believing others lie without a doubt) - is a water on their business - now someone's mind works in a favour to psyExploiters needs, this is why global machinery like wireless psyConditioning is so popular amongst psyExploiters/crooks. Knowing this - now you may know why brainwashing is so popular even from before(and then mind programming) - one's mind is used 'wirelessly' as someone's tool - unconscious mind works in psyEnergyExploiter/'vampire' favour no matter where one goes or what one does - until one consciously resolves this believes which melts like a vampire on the sun - this are manytimes believes psyConditioned in combination with some kind of fear, albeit wireless ai will try all the tricks in realtime so that psyExploiters subconscious believes stay there the way they are most appropriate for "their"

market/world, through the resources of your mind - which is perfect global parasitism business, else there would be no "depression", no 250kg people, no "paranoia/hysteria", no "anxiety" and no many other unwanted things. Mind programming abuses were also born out of (satanic) mind stealing business.

- body energy manipulation(also chk next down): this is felt like ghosts would operate on someone's body(including sexual organs) - some would call this a satanic method. Personally - sometimes it was like a ghost would come into a body and fully drain/steal energy, naturally, one is after this exhausted
- electrical neural rashes(body is violently shaking from inside,like when one stays still after experiences a hard shock): this is electricity/frequencies/artificiallyCreatedChemicalReactions/neuroTransmitters that are sometimes bursting through one's body like microwaves or some of the nerve stimulation which is eg involuntary moving a toe on one's feet, tingling feet(probably microchip) or burning feet syndrome. This is also a cause of dry heels/skin and adds to neurological conditioning. Some would call this(with other methods) rheumatism.
- neuroEnergetic punches: yap - like someone would punch someone - but from inside - in my case this is usually somewhere near a belly or a little above, body physically moves a little
- full main nervous system strong(agression)/weak(melancholia) stress: destructive rf energy is operating in 'inner body wiring'(nerves). It's like bees/mosquito would be attached on someone's nerves, sometimes it's felt on a part, sometimes through a full body. Hmm - very "good" for nerves. Depend on quantity of ai power used - aggression is usually instant with this method, this is how some serial killers were made(psyConditioning - on subConscious level, because they didn't know anything about psychotronics)
- oppressive mentality: psychological oppression is many times used - ai chooses it when it's "needed" - one feels heavy after this and usually headache comes after that
- anxiety depression moodSwings feelingNumb nervousness aggression: this are all somehow a part of energetic conditionings. Nervousness and a great distress is usually always there - also we all have too much rfEnergy, which is a symptom of being tracked by "gps/radar" kind of automatical devices signal.
- any toxic symptoms of neurotoxins and heavyMetals!!:
almost the most abused substances in mindProgramming because any poison or radioactive element is very small and cheap and can make damage with a very very small dosage. A few webpages and it's symptoms, typical either for active but also many time passive('undetectable') mind programming ==>> [heavy-metal-poisoning](#), [what-is-Neurotoxicity](#), [poisoning/symptoms](#), [blood-poisoning](#).
- any toxic symptoms of neurotoxins and heavyMetals!!: [viagra](#)(or [this](#)) is very popular amongs brainwashers - so that ai that was created by psyExploiters - put a dosage of it possibly daily for psyConditioning/opression/etc into anyone's organism wirelessly - because it's "side effects". Almost a medal if one figures out what's the primary purpose of it - it's not sexual but some other psyChonditioning. Viagra was a lot used on some of us in childhood for psyExperiments - back then "satanic sect" searched for 'wonder-drug' used for their mindPro-gramming business. Lsd-25 - which is a special drug especially for mind programming...
- any toxic symptoms of neurotoxins and heavyMetals!!: maybe you guessed it - any kind of antipsychotics!! many people have symptoms that are exactly like from antipsychotics(or heavymetals or poisons), now - why is that? simple - most people are a part of mind programming - so they get their daily dosages via it for psyExperiments/managingMarket via ai(probably pineCone(TM) - via main 'gland' or via psychotronics), without being aware of that! Now - the funny part - what about people that take antipsychotics orally? hmm - 2x dosage - maybe that is why i had been always like a dead horse when i experimented with antipsychotics(they never helped my "side effects"). Just to show what global brainwashing can do and it's right in front of all mostly every day: this symptom is very very good - "worsening of psychosis", taken from [Clozapine](#) under 'Central nervous system'. [Risperidone](#) is

another(you can check lawsuits at the bottom of webpage - which are more or less brainwashing attempts either directly or indirectly). This are primarily neurotoxins for god sake! brainwashers made this into healthSystem so that business can run more easily(mindProgramming markets are always brainwashed/created like this) - by this i don't mean that doctors or psychiatricPersonell may have something with this - although here and there someone could be amongs them, because this are manytimes regular people working in quite many jobs here and there. One is either blind or brainwashed if s/he think this are "side effects", it's for managing market in an "legal" way - no one is checking it and breinwashers are of course happy. This is what i mean when i write - circus, because it seems all are naively believing some stories, although someone's intent was brainwashing...

- any toxic symptoms of neurotoxins and heavyMetals!!: almost the most abused substances in mindProgramming because any poison or radioactive element is very small and cheap and can make damage with a very very small dosage. Totally the same tests were done in concentration camps(which were mostly to get knowledge for nowadays modern wireless mindProgramming business/sport)...
- any toxic symptoms of neurotoxins and heavyMetals!!: this may also be any combination of the above and/or combination with other mindAltering things - eg otherChemicals/frequencies/psychotronics/etc. It's abuse of such knowledge - that's all, mostly combinatorics. Did you know for example that staticElectricity+air produces poisonous ozone? or that chlorine gas was used to kill people in wars? nowadays it's used for water treatment to "kill bacteria" - but in combination with mindProgramming chemicals from inside the body - it can create more things. A small dosage of toxin here, a small dosage of toxin there and daily with time, it seen on organism via health(or mental health) issues. This is also why it's called 'mind pro-gramming' - small dosages of toxins that are not too obvious, many also use insecticide or some similar thing for this.

What can be done with psychotronics?

- brainwashing: create some area/world just for me primitive egoistic motives and control or put aside others(usually nano/micro-chip or psychotronics for whole lives), and yes - some are like this that abuse mind programming, drugs, fun, etc. In fact, mind programming is the only tool that can do that globally(it can also damage any electrical device or something else), i really don't know how they manage to agree which part of the slavery world will belong to who - because they are all greedy as their kind of hell.
- brainwashing: some use them to wirelessly brainwash 'opponents', while proBrainwashers use this extensivelly - globally, also for full-blown individual monarchMindProgramming guided by ai.
- brainwashing: some use them in combination with date rape [drugs](#) - this are usually quite well paid proRapists - could be also a few young folk, kinda proMindProgramming pets. This are also used as paedophiles only to deeply psyCondition "too healthy" kids with paranoia and supression, oppressive stuff, because brainwashers are mostly oppressors.
- brainwashing: some used and still use this to fool humanity and lower it's standards via lies/supression/media-news-lies(also with 'virus' thing - 'cancer' are also nano-implantation variants - although any kid can prove that any illness/'micro-organism' can be artificially made or [destroyed](#) wirelessly - it seems best paedophile psychology used on masses has done it's job well since people are believing things - also vacciness - that they didn't check by themselves). And it's for 'managing the market'! Basic human/other regular laws are with this completelly violated for more than 50years. Brainwashers(spoiled psychopaths) made themself conditions for programmable society even before war era - electricity/(special)telecommunications+hyperPhysics=psychotronics into which some business men/girls invested a lot in the past by 'intelligence agencies', meaning - nowadays many many were being serially implanted globally in the name of psySocioEnergyExperiments and their implantation memory electronically erased after that(the reason why some don't remember) - this is how psyExploiters via

'intelligence agencies' help taken over globally 'covertly' a long time ago. There were times when they didn't hide it but of course most of people are not sadistic types and mostly didn't agree with it's systematic cruelty and it had to go to a covert sport - this are mind programming markets. If one is a good boy/girl and is by him/her-self lending their ass to their spiritual papas/mammas for some time(yup - this would be their loyalty hierarchy thing - since 'grownup' proPaedophiles are a lot appreciated in their groups - probably also on darknet) or has enough money and is of a corrupted type and knows the right people - it can nowadays use global covert mind control/programming services war like criminals and later others made in the past. Not sure - but i think 1st mind control business was first tested on prostitutes later weak-people that could not resist to harsh lobotomia psyExperiments tested on them, soldiers, cruel Mengele's concentration camp methods that brainwasher weasels protected and were probably taken to usa(which are probably still quite well payed on black market for modern psycho-physical slavery business) - are also a part of wireless ai knowledge and are also used in monarchMindProgramming(mengeles is a 2% of all systematic torturing knowledge brainwashers covertly use), finally this business was spread through whole world and is illegally used on most for 'managing the market' - albeit it's purely psychologically/mentally/spiritually/physically parasitic in nature.

- making any poisonous/neurotoxic gas anywhere in the air wirelessly via psychotronics(also kinda [e-herbalism](#) which some use for ok things - eg for distant healing - but client agreed to that - it can be called wireless BioEnergetiX): some that are destroyed with this think that some person came into the house and put poison into the air/food, the same was with my grandpa which lived elsewhere, so he was kinda paranoid that time because he thought neighbours(burglars) are coming into closed house. Nope, many of us were(are) treated that way(either by someone's ai or by brainwashers) - which is wireless poisonings. If brainwashers want to do someone real health problems(or even kill someone "undetectedly" with time) - this is also the method they use. (special)telecommunications can also later manage inbody toxins - via kinda "cia/nsa" services for such business of managing marketing. Non-corrupted people are usually more at risk, because only corrupted ones use such "fair" methods
- someone's opponents can be destroyed with this easily - "undetectedly" - while 'opponent' will not even know what hit him/her. Recipe is very easy - destroy someone's psychoPhysical health - and you destroy all that someone had, quite many end up in a mental hospital. People are more likely to be destroyed if they are not corrupted - a part of a psyExploiting pigsty, because some are testing some of the children at very early age - and if they see they can be bought with something, eg motorbike, later cars etc - they become "higher rase"/"sect" "black market" workers. More on this in 'onepage' version.
- some are reserving guys/girls for sex on the mind programming market(nowadays everywhere) in advance - so that they soner or later come into a life of someone that ordered one that does mind programming services. boring.. This can be sometimes "black tantriks" testing his/hers new mind programmed after birth sexual products, eg testing how instilling new wireless afterborn best paedophile psychology psyConditioning while a baby is still unconscious so that someone's being easier accepts subconscious brainwashing - works. Hmm - then in life a modern pimp testing his/hers sex products before their customers on mind programming markets - this kind of mind programmers are usually in 'ellite' mind programmers, because humanity must be sexually conditioned as much as possible - of course one of their bigger aces. When a psyExploiter tests one's sex product(nowadays this can be everywhere via wo-men/bi-sexual/etc - not just via prostitutes), psyExploiter knows what's going on while a 'victim' doesn't have a clue about ai helping psyExploiter inside her/him-self own mind/body via mild wireless mind control. Yap - typical weasels.. Brainwashers invested a lot so that humanity became almost blind to sexual brainwashing daily(i consider not having a semi ok sex experiences but forcing to be a part of intellect/school education also as sexual brainwashing while brainwashers don't know what to do with soo much of their sex products even from before - they for example have "black tantra" for young kids in their world - a part of designed commercial/noncommercial world by psyExploiters - to slaves intellect/radioheads/psyConditioning and to them - quality energy for their old grumpy 'vampires sect' - i hope not a croatian sect in zagreb doing business with other via creating artificial Soul Stars.. excuse me - soul scars for managing market) - a part of EnergetiX services. Deep sexual psyConditioning/brainwashing has also a special place in systematic monarchMindProgramming and [SRA](#)(satanicRitualAbuse), best paedophiles also have a special place in mind programming in general -

practicing their paedophilic psychology first on children/others - nowadays this same best of brainwashing psychology is used on most via wireless ai/psyConditioning - "bonsai" therapies are done on humanity as a part of human farms.

- partners that are not appropriate for one another can be put together - they can be also broken apart - usually used for harsh unconscious will breaking('heart breaks' could go in this category, in active m.progr. this are amplified) in direct(usually via monarchMindProgramming) this are directly deeply programmed into someone. Usual heartbreak is mostly just activated nanochip somewhere around the heart area(or psychotronics are used for hot spot) - amplifying and/or psyConditioning pain. When one does not know about mind programming - this is used for psyConditioning and for their 'retraining of our animal kingdom' for human farms - so that one doesn't freely choose usual/sexual partners - because you know - this should be available only for spoiled psychopaths, it's also a part of subconscious social class guiding system aid for managing brainwashers market, ha haaa - a kind of system in the past when parents decided who will one marry with etc - that kind of crap, then for some time nanochip is simply not so activated by ai - long before ai created strategy plan on which someone fall onto and voila - one thinks s/he made the right choice because one is now a little more in peace(it may be - it may be not), but it's manytimes because of automated brainwashing via emotions/thoughts took place, joy can be also for example simulated/manipulated - this is nowadays also a part of "psychosocial experiments" - someone's ai learning new tricks for 'subconscious'(when one isn't aware of that) psycho-social optimum exploitation guiding system.
- social isolation by ai: eg - one magically doesn't have anyone around that is interested in same things: if one wants to do something and there are no appropriate people/other after 2years - one is definitely being mind programmed
- nonCommercialSpiritual conditioning/brainwashing(their main goal, so that humanity is living an illusion they are free with a printed paper with numbers in one's hand and can be automagically psyEnergyExploited along the way): someone must manage real Space Administration - and ha haaaa - it for sure isn't by rockets put on the moon by russia/usa or any stuff in this dimension(physical plane). When one is tortured by them via monarchMindProgramming on spiritual(not only physical) plane - one is taken out of this physical plane system fully consciously(it's not via sleep/dreaming but by consciousness trafficking mindTech or psychotronics) and treated there, then after they do their spiritual torturing and spiritual psyConditioning/terror - one is again hooked up in this reality - phsyical plane, all done by their wireless ai. Real Space Management is managed by a few crooks that know perfectly well what nonCommercialSpiritually is - but their weasleness created human/other farms projects, mind programmers work also via dimensions/states most are not aware of(or just forgot that part that is a part of all of us) - nothing special but still too much(one such state are dreams, but there are others that this idiots don't want for others to know about which is a part of nonCommercialSpirituality - that's why they do all this global mind programming circus so that they could more psyEnergetically exploit/supress 'livestock'). There are quite many people that know what nonCommercialSpirituality is but it seems most just live like they live or don't want to be bothered by mind programmers elite monkeys
- mind experiments(jap, sometimes worse experiments than hitler did(usually Monarch Mind Programming phase at cca 3/5years), because this is done wirelessly(yetToCheckIfImplantsAreAMust) and in the open). While this experiments are sometimes done manually, their psychotronics MindTech is usually in artificial intelligence mode - also learning from real life - humans too
- mind experiments and ai learnings: this is their oldest trick - they try to make a few people a little cookoo(a little crazy, eg forcing artificial "head voices") - so that they can do more "legal" experiments on them/us - are health institutions making any tests what concerns this? no.. They should - they are paid for it, while proExploiters are happily with brainwashing fooling many in this world what concerns "mental illness" and so on. Even some doctors die from illness that they suppose to heal - do you see the absurd of "commercial" wireless brainwashing? which can also with time produce "cancer"? Also ai learns on most civilists nowadays - which was in the past more or less tested on soldiers
- appetite manipulation: it can be easily manipulated for deep irresistible hunger(300kg people in usa) - this

are usually a basics for mind programmers learnings(besides microwaves), or when one is hydrated - it can be done that a person doesn't feel thirsty - a part of subconscious impulses manipulations

- mind stealing: yup - mind programming is quite a lot based on this - also for refined mind/psychological energy harvesting. Mind stealing was a lot used in the past as a sport for their weaseliness - meaning if one had a great mind - eg being a good electroengineer or musicians, this idiots created mindTech to totally steal someone's mind(hers/his mind 'brain' network) and set it on someone to which one wanted it - which is mind trafficking. By this process - an original guy/girl mind was replicated and then destroyed(this is not necessary since someone's neural-network could be just copied - but for mind stealing - original mind is later destroyed and many times "mental illness" via mindWeapons is enforced). This was very in fashion in the past by "intelligence agency" guys/girls, but since they fucked up and destroyed all natural minds with this - i really don't know if they still do it. Now they can reap sahara. Of course - all minds are somewhere stored on their webservers(probably even all minds of all living humans/beings) - so if they want to install(download from "heaven" something like in matrix movie neo for kung-fu knowledge) eg Mozarts mind onto themselves or someone else in their waters - they just press a button and ai does the rest - this is technology - not just tv/radio and similar crap(ai with quantum knowledge just copies whole 'brain' neural-network and mindSet into someone - but personally i am not much a fan of this since it's kind of mind rape). Albeit this kind of mindTech it's still abused a lot - babies are usually after birth treated with similar mindTech(maybe that's why some cry a lot because of psyche molding/'fixing' via inner visual/auditory/energetic mind programming) - someone's ai via psychotronics creating 'unique' personalities to test out via life, mooji would said "we are in a movie!", yeah - still in a horror 'movie' by spoiled psychopaths
- playing animal kingdom: yap - totally their style(this is why some don't understand what is really a 'heartbreak') - playing the "federal reserves" games(sexual games) - eg oppressing other males/females on the market via mind programming(automated health/psyche management) and have the best girls/boys for one self to practice this covert sport on them - ai is helping to brainwashing(mindProgram/psyCondition) victims into the "right" direction
- energy harvesting and consciousness trafficking(mind/psychological energy stealing is by them needed to fuel their fancy building of the 'their' world via ai via our energy - a part of modern slavery - this is also why parasitic psyConditioning is used as subconscious stimuli manipulations eg thoughts/emotions manipulation, subVisuals/subLiminals/etc and neuroLinguisticProgramming at 'voice hearers' to more directly condition someone's psyche) - this is also probably why psyExploiters invest in mind programming - worldly resources are nowadays covertly abused only because of this(especially nonCommercialSpiritual via consciousness trafficking): on humans - this is mostly done via nano/micro-chips put directly on energetic centers eg meridians or main nervous 'system'(yeah - nowadays mostly designed one), then depression/disorders/irritability/etc. Most are mostly (subconscious) energetic resources to psyExploiters(purePsyEnergyParasites,blood suckers,leeches,technologicalVampires) - psychoPhysical refined energy is neutral and is used somehow like money - for anything else. To traffick this energy more - they created the word "mental illness" - so called targeted individuals(which are otherwise psychoPhysically healthy) or others with "disorders" - so that this business can covertly "legally" run unnoticed. More on this in 'onepage' version. Psychiatric manual dsm-iv codes is new "bible".
- when psyExploiters try to test some new thing on people - they fire up some political scandal - so that people/politics start a fight/war/etc: they create a false evidences(people are manytimes fooled by them) for things and then because people are not aware what's in the game and what is the primary cause of some misunderstanding - they start to fight a fight that psyExploiters created via mind control in the first place - this could be from anywhere on the earth, a button - and there is unusual smell, another button and there is a face of bloody mary on the wall, another - and one almost get halucinations, another - and someone's parent becomes a hitler(family violence), another and a 'miracle' is there. Similar method is eg used to "undetectedly" break people apart - with eg artificially firing up their nervousSystem to create artificial neurotic anger.
- "corona virus" like global brainwashing which is not a "virus"(easily done by better psychotronics): yeah

- don't tell me about it - one of spoiled psychopaths global sport. It seems brainwashers(or psyExploiters) want to do more covert psychological experiments and probably get rid of a few people and similar things - the "legal" way. Their typical excuse would be that there is too much people here, ha haaa - maybe it's too much them here
- testing new global brainwashing systems: this is mostly testing new brainwashing "undetectable" psychological/energy exploitation systems on 'livestock' guiding sheeps mentality(again: mind/psychological energy stealing is by them needed to fuel their fancy building of the 'their' world via ai via our energy - a part of modern slavery - this is also why parasitic psyConditioning is used as subconscious stimuli manipulations eg thoughts/emotions manipulation, subVisuals/subLiminals/etc and neuroLinguisticProgramming at 'voice hearers' to more directly condition someone's psyche) - like for example exactly currently we are in(core is nonCommercialSpiritual purely sadistic self-sustaining eco brainwashing system - based on cruelty - wireless mind control torture/terror/trauma in all dimensions not only this physical - more in NeuroEthics++ left menu section - but not for faint herted). Systems are also something like eg using media to start some global lie/campaign to brainwash people - like "corona virus" or.. gosh - where does "cancer" come from, there is also many violation from "intelligence agencies" in the past - usually created by 'grown up' boys/girls, some of official/known unethical experiments are [here](#)(a small doeses of radiation is still a lot a part of mass brainwashing - eg small piece in the body(plutonium? which has also heavy metal poison effects) or wirelessly created). You must know that alpha, beta, gamma that are ionized radiation - psychological schools teach we all have naturally alpha, beta, theta, gamma brain waves, which is not true - not naturally, this are there to fool people being mind programmed into modern slaves - nothing else - 'livestock' management, although it's a long story how it came to this - 'grown up' boys/girls testing their global brainwashing skills - this is how their "sect" slowly with time got quite big market share - trying to fool people it's all legal. Wars are also in this cathegory - mostly testing mind control and wireless ai learning tricks on living beings. One can be a global player so to speak - but creating business guided by ai with this knowledge based on forcing "undetectable" mental/other slavery? boring.. and unneded suffering
- global brainwashing is by beeTrots boys/girls also used to dull down other's mind(as some say - to put others to sleep - psychological sleep - mass brainwashing/hypnotism), to make others not so alive, only so - that they can play kings and queens. Controlling/manipulating others "undetectably"(nowadays via mind control) so that they are higher - is their main priority - their weaselness 'uniqueness'. This is usually the main purpose why they do all this global brainwashing circus and tortures of T.I.-s via wireless mind control - typical spoiled psychopaths
- trying to steal/replicate/traffick "soul" properties of someone(goes into mindStealing or quantum stealing category - the best "stealing" there is): mind programming abuse is not concerned much in material thing stealing - but nonMaterial. Ideas stealing are an old part of mind programming markets, but this is a little more. This kinds of electronic wireless stealing is especially done in monarchMindProgramming - eg one has some property that another that can afford it - wants. That property/properties is in original person usually oppressed/destroyed and enhanced in another one. Then - they try to fill up that "stolen psyche" hole with rubbish or with (harsh) artificial "mental illness" - so that one would forget all about that. Manytimes dementia is also used for this purpose - a part of proBrainwashing which it seems is also used on many people for "commercial" purposes.
- the things that one would get as a 'natural way of life' is intercepted by psyExploiter(s) - which also includes the best of "free" girls/boys/etc for sex. This is sometimes also a reason for so many heartbreaks - because people behind this know what's going on and the one on other side doesn't. Sexual attraction is easily established with mindTech - even someone on conscious level that would otherwise not be for that person, which are deep artificial sexual magnetism mindTech games on a push of a phone button. If one is affected by this - it feels like the person who feels deep hunger - and must eat something instantly - but here this is deep sexual desire. So - sexual desire can be, and many times is manipulated with this - usually by someone's wireless ai - although if someone want's a free night girl/guy, he/she just pushes a button on a watch/mobilePhone etc, and voila - fish and chips - also meaning sex can be also indirectly used as an aid to mind programmer idiots - also via so called black tantra - which is nothing but sexual energy stealing and/or putting other undetectably into psychological slave mode. There are people who

experiment in sexuality via different partners - which is ok, but if one of these idiots wo/man happen to come into your life(or a guy/girl which is indirectly used for that via mind control), they are doing this to hook people onto their ai - strictly for business. Sometimes they also have sex rituals when a victim falls into their circle(also a part of monarchMindProgramming), which is usually there for implantation or more brainwashing/psyExperiments. This is also why i recommend "workshops".. having a bleeding heart all over the place is of course not so good idea.

- this can be inverted, eg some are prevented to get from life anything(here also thought/ideas prevention/destruction inside individual mind is used). This can be a part of anyone(without someone realizing that) but usually mostly for targeted individuals, which usually don't have sex not because they never did, but because this mindTech does everything that one does not get appropriate partner(s). This is with a reason - and is a part of social/isolation conditionings(nonAppropriate(sexual) partners are encouraged by this mindTech - this is especially noticed in active m.progr. if one "hears voices" - they always say yes to anyone unappropriate. This is also so that one would "get into trouble" etc)
- to make someone totally "insane"(typical for targetedIndividuals but is also used as social engineering on most in mild forms): mostly filling/forcing someone's mind/body(especially nervesSystem) with microwaves/other wirelessly done by ai - and voila - ha haa - someone almost becomes a hitler(this is how he was made also - aggression/madness starts to build up and can be usually measured), so that one would start to doubt his/her own mind - which psyExploiters use for instilling 'mental enslavement' triggers/mind. This is all there is to so called "mental illness"(primitiveness is another story). This is usually the stage where people are being put into mental hospital because of paranoia or other similar stuff. Do psychiatrists know anything about mind programming? no.. Are they open to this subject? i didn't yet find one. Hysteria is also a by product of dew(directed energy weapon) treatment by someone's ai. In preMindTech era - creating white psychological madness was tested by some husbands(businessMens/etc) on wives to advance their hypnotic skills if she was mostly at home(isolation methods) - eg, they rearranged some things in apartment or take some things and after that told her that she is just making things up - because she doesn't remember(or can't control) what she is doing and that she needs help. But if she's being "hooked" on brainwashers idea - then "help" becomes anything one wishes - some hypnotists were(are) ab-using this same methods(the same goes for mind programming and t.i.-s). That's how some enslaved someone's mind and s/he was someone's psychological slave(some woman probably done that with their husbands). This kind of tricks were incorporated into psychotronics - for "going nuts" tricks - but much much more advanced - so that abuser can later do with one whatever he/she wants to practice one's brainwashing skill on human toy.
- nonCommercial spiritual management(who all has a key for this fancy 'nonPawns' things?): nonCommercial spirituality is their main thing of modern terrorism with which they are running this modern slaves show. Some of us are probably on their "black list" because we don't believe their crap global kindergarten lies. Eg unlocking a part of gravity fields - a lot used in monarchMindProgramming for nonCommercialSpiritualConditionings(but they probably won't do it - their slaves markets and their car industry and all their ecoSystem crap would go to hell, although all of this could coexist with nonCommercial spirituality - but they want to be exploiting bosses what concerns this) - which is unlocking a part of their artificially locked space(real space management) - special 'black government' transmitters? maybe.. typical them - using all for their asses and others can have illness and death.. More in 'onepage' version.
- monarch mind programming: which is a beast per se(kind of the best of mind programming) - how to totally reProgram someone's mind/spirit from ground up and make a (trafficked) kid a product for their markets of modern slaves. This is trauma based direct mind programming long psyTorturing/proPsyConditionings processes - only the best from all history tortures in one place - probably from wars too. Usually done hard once in a lifetime with children - torturing with no limits - usually only here direct mind programming is used in physical/mental/spiritual/sexual/etc waters(dr Mengele's cruel experiment with twins/children in concentration camp are for example also a part of this - leaded/integrated into their ai knowledgeBase/dataBase/metaBase(meaning-one can replay anything-anyMetaExperience recorded from anyone wirelessly on anyone else wirelessly covertly - and that person will experience the same - a part of their pigsty) - some say a lot of singers/actors/sexIndustryWorkers

were done like this - also for hollywood - monarchs, but with time this became more available and cheap and many children become a part of it just like this - including myself(hmm - i really don't know what they wanted to reProgram me into - although they offered me a job of serial killer and i would immediatelly get a nice house and some tools - but i said 'you forget to bring me ice cream' - then - it was more fun'n games direct mind programming by then still spiritual torturing - full mind+reality around someone manipulation - spiritual/quantum very precise high class "military" like control - something like in a matrix movie but not so fancy). More in 'onepage' version.

- artificial social classes..
- artificial personalities used in social experiments/business - instilled ego: how much appetite someone has or doesn't have(250kg people in usa experiments as extremes), who one will like or dislike - reprogramming/rewriting the real natural impulses and then broken hearts(TM) everywhere, what one will like or dislike, social conditioning via social interactions via 'subconscious' nervousness/anxiety guiding, how intelligent or 'dumbed down' one will be, what kind of general personality one will have, etc. Some tested this methods in the past on themselves in semi-rich classes(they either microchipped themselves right into head center to drive one's new personality or other methods were used) - nowadays, this is used everywhere - not just in mild subliminals at some of supermarkets to buy more products - but in people's lives. The more one notices/realizes how this works - the better for one who is experiencing it - albeit this becomes very obvious and can't be missed when one is a part of active mind programming. For others - one can just watch here and there how your mind/thoughts/emotions/energy works from inside or in different situations - this are mostly psyConditioning strategies by wireless ai trying to psyCondition someone as much as possible to suit psyEnergyExploiters 'livestock' management market needs, the problem is - that many identified with something that is originally not a part of them, but subconscious artificial personality instilled from when one is born to suit what weasels needs on the market - so that one doesn't notice artificial personality parasitic mixture of artificial subconscious believes in oneself when one grows up - which is ego. The good news about this is that it's not something to learn but notice how it works from inside and then throw away what is not yours. This would in ideal world without mind programming not be there - but unfortunately currently it's not so. Exactly the same methods are used by some psychotherapiest and by some non-corrupted gurus - which also recommends same things.
- artificial social experiments with brainwashing methods being guided by ai from which their ai learns - which has already more that a million psyConditioning strategies..
- autoSchool subConscious psychological conditioning - eg via a variation of psychic driving
- full wireless health management(psyEnergyParasiticMethods - some are covertly microImplanted with microNeuroStimulators in childhood - but this is not a must): this is abUsed a lot - on many many people(if not all) - again - wirelessly, meaning passive(notNoticedByNovices-normalPeople) or active(soCalledTargetedIndividuals - on which health is deliberately destroyed usually 24hours a day - tadaaaa - i am amongst this - also having tinnitus and "hearing" voices(which is deliberate neuroLinguisticProgramming/psyTorture which can be proved - more in leftMenu 'Voice hearers')). This health hokus pokus also means full social control over one's life - usually by ai strategies(in passive mode novices won't know a thing). Here - modern brainwashers goal is to make mind programming as unnoticable as it can be - so that many illnesses look like they are 'natural'(eg cancer or mental illness or bipolar etc) - the same methods and strategies are implemented in their artificial intelligence who is used nowadays on pretty much everyone worldwide - mindProgramming SuperMarket via ai - pretty much meaning market of modern wireless slaves, also for psyExploiters so called Human Farms - eg for psyEnergyBusiness. Hmm - where do you think depression or extreme health issues(like paranoid schizophrenia/psychosis) are comming from? this are tools of mindProgramming markets
- psychic or exo/para psychopolitical wireless dictatorship(alla "hitler's" dreams - i call them spoiled psychopaths) - harsh wireless psyTortures: one pretty much at that time feels something like one is wirelessly abUsed by 'kkk' sect on [this](#) pic/book - like one would have a psychiatric brainwashing helmet on but no physical helmet is there(active/direct but not passive mind programming) - mindTech opressions/psyEnergyExploitation - which is a lot used in monarchMindProgramming(whoever was a part of) for deep psyTraining like one would be their animal, eg - one is implanted(or other wireless methods

are used) and then trained, eg "our doggy - sit!" - and voila one can not help oneself but sit - because totalMindControl(wholeMotoricsToo) is used - meaning terrorists have wireless controls in their hands of someone whole mind/body(includingWholeMotorics) - an old primer on an animal is [here](#) - that time done openly by neuroScientist delgado(in mindProgramming methods are similar but covertly implanted) - although some methods are nowadays more advanced. This are just a few examples - other are usually(especially in monarchMindProgramming long psyTortures processes/trainings) much much worse. I call it open but covert wireless concentration camp - which it is. Psychotronics could be used for ok things - but nowadays they are mostly abUsed for exo/para psychopolitical social games by psyExploiters, eg deliberate harsh bullying is a method in mind programming - ai also uses it quite a lot. The same is with eg - mobing

- fully broadcasting artificial reality: yap - some invested into this a lot - "black ops"(i call them "trotter traders" or just trots or baboons) use this a lot for nonCommercial spiritual brainwashing - which are nothing but extreme psyExploiters/extremePsyExperimentators, exploiting system makers. "Corona virus" is a mild example of this - mass illusions forced from media, psychotronics etc around people's minds - nowadays if they wanted to - they could probably easily make all people hallucinate the same contents - whatever that is. Some also have this mindToys - but not all abuse them for making proSystems.
- humanity have mostly designed mind/brains: meaning braiwnashers wireless ai has made a few things - eg brains were divided into hemispheres quite a lot time ago when wireless mind control was understood better so that only a little psychological flow is used by "lower rase". ProExploiters don't have mind like "lower rase" this could be checked - they don't limit their minds but expect from others to be their homo-sapiens working class - a part of modern neuro marketing abuses which has by now a long history.
- spiritual conditioning: harsh spiritual abUses known as Cyber Torture Terrorism which is the best direct mind prorammig - usually the worst there are where consciousness/mind/spirit is programmed via the most vivid terror like an computer - nowadays this can be all wirelessly done. This is why proExploiters have smiles bigger that their faces - because the most violent terrorism can be easily hidden that way to "teach someone a lesson"(like in hidden family violence but much worse) not to play with "their modern slavery market". Someone wrote - "mind has no firewall". Exactly..
- black magic or voodoo: whoever doesn't know what psychotronics are nowadays capable of - could in the old days think s/he is under a spell of a black magic or voodoo, or may think that devil/badSpirit obsessed him/her or some used exorcism on someone. Of course that didn't help in the long run, because in reality - nothing was really done to get rid of mindProgramming
- etc etc..

Micro/nano-chips and it's locations

Anything that can be done using nano/micro-chips+telecommunications, can be also done with psychotronics(no chips), so any problem in health explained here can be also because using only psychotronics. Paragraph ending with '...' means there is more on the website:

Personally i don't know anyone that would not have at least one symptom of this:

- head: brain-radio right into head center(you can check What is mind programming Show/hide images for more), brainwashers from always looked for something like this - an easy method that works for 'livestock' management, amongst other things states are easily managed like this in realtime via eg [this](#) or [this](#) but put on unheard level(i recommend checking this and thoughts consciously sometimes). Ha haaa - we are all here in slovenia living with tiny brain-radios in our heads for more than 50years for "social experiments"(could be managend by scalarWaves or psychotronics), in other areas it's probably the same, corrupted satanists and others probably don't have better thing to do like this kind of automated "market management".

- head: top or around the head skull under the scalp usually also including forehead - a part of below Jesus crowning method of implantation described below for kind of [radiohead](#) protocol ("voice hearing" or any other audio contents played into someone's head are probably created this way also - we supposed to be their pioneers of this kind of psyExperiments for "market management" while psychiatrists try to show off their diploma not knowing this is the problem especially with people that "look normal" and never get angry - which are just suppressing all the mind programming abuse madness inside - of course subconscious madness can be released in safe ways no matter if one is targeted individual or not also via fun - i recommend workshops for this - else - one is just more depressed). These are very tiny but many nano/micro-chips to produce states or for perfect psyConditioning or anything else.
- head: prefrontal cortex is usually implanted because it's a place of decision making - one can at active mind programming pretty easily notice muscles being stimulated there, some that have completely destroyed forehead or have that deep furrows/scars is because of this (and rf/psychotronics stimulating them) - also 3rdEye 'cyclops' microchips - sucking refined vital energy out of someone for energyTrafficking - this is also why so many are on antidepressants nowadays
- head: very popular among brainwashers is putting nano/micro-chip right into the brainstem - from the back. It's quite easy to do and it can control many motorics (and probably mental state/disorder), and if it's drug-delivery nano/micro-chip, it can be put anything into anyone directly into mainNervousSystem/perfectNanochippingSpot, mgDoses of heavyMetals/poison/ (psychotropic)drugs/antipsychotics/etc, could be also at the "right" time so that someone is misdiagnosed with anything ai (or brainwasher) wishes (experienced this many times, also by some 'mental health professionals'), this is also why doctors are also brainwashed - "undetectable" indirect mind control works easily
- head: from side of the head a few centimeters back from the eyes - through temples - usually injected, in fact - many can be injected, once psyExploiters figured out how to implant someone properly for mind control and/or brainwashing psyEnergySocial business - they in the past done it serially on many many on big areas
- head: this is sometimes seen on regular ct - but some mistake that spots for something else. There were times when some kind of microcrystals were used (in the past this was used for ears). Eyeballs may be used so that psyExploiters ai sees directly what someone sees - so that ai can base on that use bioFeedback in realtime (although there are better methods for this - eg using nonCommercialSpiritualManipulations or quantumField) - eg: depends with whom one is - and based on that usually both persons are in realtime mindControlled appropriately or whole groups. This is the real 'mediator' mind programming (and their slogan "we are always in between" - aka divide and rule) - used a lot nowadays.
- head: right into head bones where there are free small places in between skull bones (hmm - this represents Jesus crowning suffering - for "undetectable" modern mind control - usually fully around the head). Now - what do you think that American big woman statue of liberty represents? yes - you could guess it, not sure but at 1st - i think this was an overruling of natural psyche ('witches'/others similar) in favour of "white supremacy" (spoiled psychopaths) via mind control. This is how a looooot of people became unconscious psyExploiters market management livestock / mind tools. After mind programming marketing took over many areas of the world not just women but men/children/etc became neurotic - anxiety/nervousness/stress/hysteria/others were born out of this. This is kinda perfect implantation - because any frequency can go right through the whole head - it can broadcast via whole skull from inside so it's perfect neuroLinguisticProgramming, subliminals, thoughts/mind-chatter instilling - prefrontal cortex brainwashing/programming - including creating any perfect sound when "voice hearing" effect is activated in someone (kinda 3DDolbySurround)/voices/tinnitus/any disorder or "mental illness" (which is torture - current modern "system" is based on this)...

- head: right in the back of the eyebrows - inside the skull - could be also used as an aid to subVision or prefrontal cortex management/manipulation/control/torture/etc
- head: sinuses - the same as above. Top sinuses for headache management and lower at each side of the nose for emotional conditioning. Sometimes harsh headache like someone would have a kind of heavy bullet right between the eyes - thinking is blocked for that time and pain is there - a kind of harsh pressure. This can of course also be done via psychotronics without nanochips
- head: all 3 places implanted at the same time were/are serially done on many people: hearing(inner-ear: tinnitus, voice hearing, psyControl,easier entrainment of thought/emotions,'undetectable' control of someone's life like garage doors with wireless key fob but mostly managed by wireless ai for mass 'social experiments',etc) - it also creates sound like one would have an aviation or sometimes that sound of powerful transformers in head besides tinnitus high pitch tones/noise, nose(also sinuses area - reasons are mentioned up and also for prefrontal cortex decisions/thoughts management and helping to redirect someone's goals to brainwashers goals), throat(so called forced speech via tiny neuromodulators-readers-writers and for trying to read what person is thinking through this because throat muscles become a little active when one thinks any thoughts) - when doctors diagnose someone with "throat cancer" - this is it - but very tiny nano/micro-level implants. Many times goes with this "holly trinity" also seeing - what someone sees - which makes someone need glasses. All this 3(4) creates what is called a programmable psycho-physical-control interface, so that wireless ai easier reads/controls/psyConditions/opress someone's thoughts/ideas/hearing/subliminals/visions/etc - brainwashers sarcastically call it 'baptized head' or sometimes 'motor head'. If you think this is not true - you just don't know their kind, many won't recall early implantations simply because memory was electronically erased after the procedure. All this may not be active for years and one may not even know this is a part of him/her, but if brainwashers want so - they push a button and this is activated and one is a part of active mind programming just like that - even if tinnitus can be done in more ways - this is the most common reason. Yup, this would be also a part of "social experiments" and modern concentration camp sport/business - a part of wirelessly programmable psychological health society by ai - doctors just don't check it usually because they go with school teaching protocol at nano/micro-level or psychotronics workings else they would probably find it.
- head: would you guess without reading where this are also put? .. this are also sometimes put in beauty marks or below them
- head: main head centers and/or any cortex - similar or in cooperation with brain-radio above. In the past some semi-rich put an microchip to test how artificial new personality would work on them - the same procedures were later abused on people - then of course "aliens did it!" aliens of course didn't do it
- head: tears glands which i don't know why they are implanted with nano-chips or nano-materials, of course in the long run it can add to bad health
- throat: usually males directly in adam's apple - usually in combination with speech/hearing/etc - otorhinolaryngology stuff and it's connected nerves. A lump in the throat? this is it, either via nanochip+dew or psychotronics guided by ai. Also, this is why some have "cancer" on throat - it is not from smoking alone - shield that area and pain if is there will usually go away if it's not really harsh 'treatment'
- lungs(somewhere in the body at the 'heart' chakra): this can easily produce anxiety and/or deep lungs pain(if your personal doctor is ignorant about this(eg just gives you a creme like mine did) - replace it - it's a part of brainwashing) - while some go to psychologist for it - but it's usually this
- heart: heart palputations, 'i am a little anxious' thing, heart pain or harsh heartbreak('vampires' like bleeding hearts quite well)? yes, 'just a little anxious' can also be a sign one is nano-chipped(hardwired) right inside heart. This is done easily - one simply with injection puts micro/nano-chip anywhere in the body(including heart) with the help of mobile ct/x-ray/mri/etc while one is under narcosis - they've done a

lot of this tests before on animals without narcosis in their bought areas(not hospitals) that later died if they were not chipped right because they were guinea pigs. This was in the past called "nazy doctors", but this were doing brainwashers - it became more like a sport for them on a black market because they don't care if one dies or not while at procedure. I think this was in the past just here and there - but then weasels had the cunning idea when this sport got under their skin, "why wouldn't we do it on all and put all on wireless ai"? Again, only two options: either nano/micro-chip right inside heart cardiovascular vein(known as 'heart artillery' or ox heart or hardwired in brainwashing jargon) + special telecommunications or psychotronics are used. Wireless ai is through life always using the right time in passive mode(eg when two people break up) for this to fool people for social psyConditioning/brainwashing purposes and more heart bleeding/pumping, but in active this becomes obvious and ai is using same things just like that for daily tortures. Heartbreak? are you kidding me? yeah, well - you don't know brainwashers ...

- solarPlexus(in the middle of the body below heart - mostly for parasitic energy/personalPower "satanic" harvesting, oppressions and at the same time - "subconscious" control): only this can produce total depression, lethargy, irritability, sometimes feeling sick and other stuff. Somewhere between this and upper 'heart chakra' - diaphragma(or somewhere near) may be implanted - health is then managed also via anxiety, acid flux, short of breath, etc. What concerns psychotherapists etc - same as above. When someone has implantation symptoms - usually folk goes to psychotherapiests etc, but when mind programming with eg proWBan nano/micro-chipping is involved - well, it's obvious why talk alone can't help.
- solarPlexus(in the middle of the body below heart - mostly for parasitic energy/personalPower "satanic" harvesting, oppressions and at the same time - "subconscious" control): here - psyExploiters also many times experiment with implanting nano/micro-wires(tungsten(also used in regular transparent lightbulbs) or something else) - long needle is used for that and in nanoWire in it - they try to hit nerves stiching that directly through that body area. Then they try a few tricks wirelessly - if nanoWire gone through nerves - if not - the do it again. For this managing of health is via: creating anxiety,nervousness,irritability,lethargy,depression,etc. This are mostly in modern world created via this. If any electromagneticFrequency(including "dirty electricity" in houses) hits that wires(which are nowadays everywhere) - centralNerves wired with nanoWires automatically reacts - bad overall health. "Nsa" and their guys tricks(some are balkans, some are gypsies, some are from elsewhere, some are paraSoldiers,some are talking drugs and are like from that movie jack ass. This are usually also hollywood circus makers - creating actors/singers/etc products out of children via monarchMindProgramming for explicitly "their" market - spoiled warlike criminals. The best singers are certainly not being a product of mindProgramming,nor do they usually talking drugs/alcohol)
- haraChakra(belly): usually left or right from it - may be combined with sexual or other organs above belly for wban(micro/nano chipping alla wirelessBodyAreaNetworks style)
- hips: depends on 'black market' implanting wirelessBodyAreaNetwork(wban) system used - but hips are mostly also micro/nano-chipped directly into the bone(hmm - how the hell got there? proExploiters toys), this is why people start to complain that they suffer from pain in the hips
- back: probably yes - from the back beneath the throat and especially that lowest back thing
- sexual organs: this are usually also implanted for different reasons(in the past brainwashers cut young boys/girls so that they couldn't feel no pleasure). Many have them right in between penis and anus or prostate - and have some kind of stiches there. When activated(active mind programming) - used as a part of automated torture through 'sweet' spots or to make one agresive/fullIrritable/fullNervous instantly or to disable someone instantly - this is usually through testicles which some have implants in them - but are usually there so that directed energy weapons/other knows exact location like gps when one in software program(usually ai) chooses - torture through testicles or simulate sexual energy for sexual psyConditioning purposes. This is a little easier noticed in active mind programming.

- legs below sexual organs: some kind of artificial material may be there - i am not sure what that is for
- thighs: some of us were there impregnated with some of nanomaterials - it's seen - this are called 'chicken' skin and is usually more sensitive on sun
- feet: this are usually also all over the place at that locations. Typical symptom of dry heels means one has microchip in heel, toes, etc. Typical symptom is also tingling
- feet: do you have any of [these](#) or [these](#) even in not so obvious form? notice that this can be also on places where feet are not touching the ground! hmm - new type of primary wireless healthcare! official medicine is still secondary. Regular home pipe water has heavy metals in (and small poisonous organic materials) which adds to concentrating these metals in the body (also feet/skin) hard skin, so for start - you can start drinking pure distilled water for a little improvement of dry heels/corns, body will also feel a little better - eg no joint pain anymore. By the way - brainwashers have brainwash many that our body need iron/etc to function, while heavy metals are even from concentration camps known to be good to make people dumb and ill, heavy metals are good electrical conductors that helps psyExploiters global "undetactable" health opressions, that's why you find them in "vitamins/minerals"/water/food/fertilisers/etc, yep - psyExploiters jobs. Now - what do heavy metals in body (regular sea salt is full of it) do in combination with other things? brainwashers eco magic! there is no one that i know of that doesn't have too much heavy metals in the body, this was proved, it can be again..
- joints: any joints all over the body. This is in reality what "cancer" is (also energy experiments/business) - which goes together with other body locations and "social-psychological-energetical experiments" - although nowadays mostly a part of illegal business and managing markets

And then - some don't know where '[cancer](#)' comes from (psyEnergyExploiters/brainwashers corrupted satanists are doing global slavery/brainwashing/sheeps projects from a long time ago to fool/exploit masses for EnergetiX profit and psychic energy trafficking - global resources violations/stealing - human farms for nonCommercialSpirituality quantum fuel and other games for their idiotic highness to create anything they want with a push of a button while modern slaves are brainwashed with (mental)illnesses names for oppression and for vital energy trafficking (psyConditioning is there to create more of this - although nowadays they try to reap sahara for god sake) - this is why they had to invent words to fool masses - 'cancer'/depression/etc), of course psychotronics without nano/micro-chips can do the same.

Is all of this for real? of course it is - it became some kind of sport and most are nowadays a part of this because with time - "psychological experiments" (and mindControl) advanced very much without much being told to public - some just use this style on most - that's all.

If someone has more info about this - you can send me an email and i'll be glad to put it here.

Some links

Quite usefull information - but don't just 'eat' it when you read it, it may have something to do with you or it may not.

There is a lot of white lies on the net what concerns this subjects - so that's why.

I don't recommend reading this when one is too tired.

Wilson - psychotronics warfare and radionics](#) - i mostly agree except with becoming a christian(a prayer or meditation won't hurt anyone and personally i am not against it, but there are other things to check eg vacciness if information on firms label is the same as when analyzed,also if it is - aluminium salts in vacciness are very 'good' for health/nervousSystem especially in combination it can become a toxic mixture eg salt acid) and better psyWeapons work on all minds not just weak and to remove toxins - just drink pure water, and yes - psychotronics(specialized telecommunications) were developed over 100 years ago and can be also used in plus(some bioenergetics use them like this) like it's written to kill germs, stop cancers, calm the nervous system etc at a distance - althought of course - in hands of psyEnergyExploiters/brainwashers business - it's used exactly in the opposite way and used for egoistic games eg covert programming/opression/brainwashing/guiding psychophysical health of others for more psyEnergetic exploitation/psyEnergyExperiments. Although i think brainwashers psychotronics could be also backed up by sigint(signal intelligence) - but for this usually crooks must have an access to eg most media databases - tv/radio programs.

There are a looot of books about the subject, some of which concerns whole population, also, anyone - including kids(add/adhd/neurol.Disorders/etc) - can become a part of active or even direct mind programming nowadays, older people are usually a part of active via dementia/rheuma/etc treatment - a part of global automatized brainwashing business:

- targeted individuals(which is active mind programming) - one can search the net or check regular online stores like amazon, nowadays most with intensity variations
- good books like [this](#) that don't mention mind programming worldwide problem, although rf radiation is a part of mind programming. (Special) telecommunications can lead masses via nano/micro-chips. If one want's to quickly oppress minds from a mass - one puts powerful rf towers in some area - nowadays this is done "undetectable" - and ai regulates how much power goes through(intelligence agencies done in the past a lot of tests on irradiating some of population) - organisms somehow adjusted to it - but newer completelly. No rfEnergy is harmless(usually it goes through whole mind/body/nerves) - although it won't kill you, directed/focused one that mind programmers ai is also using or signals that affects nano/micro-chips is more of an concern.
- there are also some books about mind programming like [this](#)
- there are good books about monarchMindProgramming: some are in left menu section - this are very good books and everything written there holds true, but not all is written there. With this they like to oppress or torture wirelessly anyone, that doesn't agree with their modern slavery system guided by wireless mind control. Global brainwashers are running modern slavery business via physical and nonPhysical automated control - wireless ai, so that they can play kings and queens, that's all.

Here a few inventions taken from g.patents,

but there are thousand, if not more that are ab-used in mind programming.

This inventions are not a problem. A problem is that some people are systematically using them for mind programming(modern hard brainwashing) - some devices are even advanced from this one's and/or custom made. Why they don't just use a big shovel or a hammer, that would beat someone on the head daily? Hmm - because then, it would be too obvious.

So, there are already many inventions

that are used forthis - many more are available at any link at the bottom of each page.

- [Method and system for altering consciousness](#)
- [Apparatus and method for remotely monitoring and altering brain waves](#)
- [Method for programming the mind to follow a behavior plan - this are using 'handler\(s\)' of t.i.-s\(check google translate - you'll see what i mean\)](#)
- [Altered states of consciousness in virtual reality environments](#)
- [Method for drug delivery in association with medical or surgical procedures\(this, if used are usually in micro wireless form\)](#)
- [Systems and methods for altering brain and body functions and for treating conditions and diseases of the same](#)
- [Hearing system and "Voice Hearers" - this is strictly for dark sadistical neuroLinguisticProgramming\(part of psyTorture/opression\) - heard like totally insane psychos would whisper or talk their ideas\(nlprogramming\) directly into someone's ears/head\(this only may make psyTorture effect and someone totally nervous/tense, because one can not get away from it - it's forced - and heard like someone would have a radio of voice\(s\) in one's head aka 3DHolographicHearing\). Some misunderstand this as a part of psychosis/schizophrenia - but this are just this systems which a few idiots use on other people to play on them psyTricks wirelessly. There are many more this kind of inventions - this is just one of them - so, just one method. Tinnitus? bingo..](#)
